DIGITAL BUILDING INFRASTRUCTURES

 **legrand**[®]

NEW TX³ RANGE PROTECTION YOU CAN RELY ON

Designed to meet the requirements of modern installations in residential and commercial applications, Legrand's new TX³ range provides effective protection against short-circuits, overloads and residual current faults. The range, which comprises thermal-magnetic circuit breakers and residual current devices and is complemented by numerous control and signalling auxiliaries, ensures safety, ruggedness and a high build quality for your installations.

RCDS

- In = 25, 40 and 63 A
- 2P and 4P
- Type AC and A
- Sensitivity: 30 and 300 mA
- Compliant with IEC 61008-1

THERMAL-MAGNETIC CIRCUIT BREAKERS

- $I_n = 2$ to 63 A
- 1P to 4P
- C curve
- Breaking capacity: 4,500 A and 6,000 A at 230/400V
- Compliant with IEC 60898-1

Common auxiliaries

Legrand offers a wide range of control and signalling auxiliaries common for all circuit breakers in the TX³ and DX³ ranges.

For more information, see p. 6

TX³ - SAFETY ON ALL LEVELS

The new TX³ range ensures safe installation and operation for maximum protection of people and property.

A PRODUCT DESIGNED WITH SAFETY IN MIND

The product design and materials have been carefully developed to allow air to flow freely between each device to avoid overheating.

WIRE GUIDE FLAP

Avoids connection errors for an increased safety level, by preventing insertion of the wire behind the terminal.

RELIABLE CONNECTIONS

Pin-type comb busbars guarantee connection quality by eliminating the risk of short-circuits and ensuring a reliable connection via the top or bottom of the device.

INCREASED SAFETY

IP 2x terminals - no direct contact with live parts, even with the faceplate open.

RISING CAGE CLAMP TERMINALS

For high quality, durable connections.

Limitation class 3

Circuit breakers with class 3 limitation provide excellent short-circuit protection. They limit the short-circuit energy released in cables and hence help to extend the service life of an installation.

TX³ - INSTALLATION AND MAINTENANCE MADE EASY

For ease of installation, wiring and maintenance, the new TX³ range has a number of features which help save time at each stage of a project.

BISTABLE CLIP

For easy positioning or removal of the product on the DIN rail. Compatible with flat-blade or Phillips screwdrivers. Ensures even more comfort during installation.

CLEAR MARKING ON THE FRONT PANEL

For quick visual identification of the relevant information - product name, position of contacts (ON/OFF), curve type, rating, breaking capacity, limitation class, etc.

EASE OF WIRING

The shape of the screws and terminals ensures excellent mechanical withstand of the wires and limits contact impedance, temperature rise and heat loss. 35 mm² high-capacity terminals starting from 25 A rating MCBs.

ERGONOMIC LABEL HOLDER

For customisable labels. These holders provide effective, durable protection for the labels which are used to identify circuits clearly for the purposes of rapid intervention in the event of an error.

Clamping screw for flat-blade or Pozidriv screwdriver. Reinforced terminals allowing tightening torques higher than those recommended by the standard.

TECHNICAL LABELLING AREA

For quick identification of each circuit according to the wiring diagram.

Quick visual identification of the function

Black handle - circuit breaker
Grey handle - switch

AUXILIARIES - OFFERING FLEXIBILITY FOR YOUR INSTALLATIONS

Legrand offers a wide range of control and signalling auxiliaries for TX³ circuit breakers to monitor and control circuits remotely.

These auxiliaries are used for remote control and information feedback purposes in commercial premises and are also common to the DX³ range.

21 CATALOGUE NUMBERS

Auxiliary contacts and fault signal contacts, shunt trips, undervoltage releases and motor-driven controls. Available in 0.5 or 1 module wide.

MARKINGS ON SIDE PANEL

Technical information, such as identification of the function, schematic, connection and mounting.

RETAINER CLIP

Auxiliaries are equipped with clips for quick, tool-free assembly which ensures a more robust unit.

ACCESSIBLE TERMINALS

Visible, accessible screw heads make wiring easier.

CLEAR MARKING

The arrow on the front of auxiliaries allows instant identification of the circuit breaker to which they are linked.

Optimised space in the panel

Legrand motor-driven controls are the most compact on the market at just **1 module wide**. These motor-driven controls are used with TX³ circuit breakers.

TX³ - HIGH BUILD QUALITY AND ENVIRONMENTALLY- FRIENDLY

At Legrand, we take pride in the quality of our products. The TX³ range has many approvals issued by independent certification bodies, renowned for their strict requirements.

Rugged reliability

10,000 operations
Electrical endurance

- 25°C to + 70°C
Extreme operating conditions

ECO-FRIENDLY

The TX³ range has been designed to comply with different environmental requirements such as the RoHS Directive.

COPYTRACER - THE FIGHT AGAINST COUNTERFEITING

A unique serial number is printed on our circuit breakers which allows customers to check the authenticity of the product using the online Copytracer facility at www.legrand-copytracer.com.

PRODUCTS CERTIFIED ACCORDING TO INTERNATIONAL STANDARDS

- Rigorous, recognised approvals are renewed annually, such as VDE (Germany), GOST (Russia), TSE (Turkey) and UNE (Spain).
-
-

Certification of Legrand's production facilities

- ISO 9001 for quality
- ISO 14001 for environmental protection

MCBs TX³ 4500

thermal magnetic MCBs from 2 A to 63 A - C curve

4 032 61

4 032 94

Conform to IEC 60898-1

Breaking capacity:

4500- IEC 60898-1 - 230/400 V~

4.5 kA - IEC 60947-2 - 230/400 V~

Can be equipped with DX³ auxiliaries (see opposite)

Pack	Cat.Nos	Single pole 230/400 V~	Nominal rating In (A)	No. of modules

Auxiliaries and motorised controls DX³

4 062 58

4 062 62

4 062 66

4 062 78

4 062 82

Pack	Cat.Nos	Auxiliaries	No. of modules
		Mounted on the left-hand side of the MCBs Possible configuration per device: 3 auxiliaries including 1 control auxiliary Allow insertion of the supply busbar	
		Signalling auxiliaries	
1	4 062 58	Auxiliary changeover switch, 6 A - 250 V \sim Indicates the position of the contacts of the MCB	0.5
		4 062 60 Fault signalling changeover switch, 6 A - 250 V \sim Indicates opening on a fault	0.5
1	4 062 62	Auxiliary changeover switch, 6 A - 250 V \sim Can be changed to a fault signalling changeover switch	0.5
1	4 062 66	Auxiliary changeover switch + fault signalling changeover switch, 6 A - 250 V \sim Can be changed to 2 auxiliary changeover switches	1
		Current shunt trips	
		Used for remote tripping of an MCB at the supply end	
1	4 062 76	12 to 48 V \sim /=	1
1	4 062 78	110 to 415 V \sim	1
		Undervoltage releases	
		Time delay adjustable from 0 to 300 ms	
1	4 062 80	24 to 48 V \sim /=	1
1	4 062 82	230 V \sim	1
		Stand-alone release for N/C push-button	
		Used for positive safety tripping on the control circuit via an N/C push-button Prevents the device with which it is used tripping if there is no supply voltage, while retaining the possibility of tripping via the control circuit for 60 hours minimum Not suitable for the supply circuits of moving machinery (e.g.: machine tools)	
		4 062 87 Stand-alone release, 230 V \sim supplied with battery	1.5
		4 062 85 Replacement battery for release Cat.No 4 062 87	
		Motorised controls	
		For mounting on the left-hand side of 1 module/pole MCBs Enable the products with which they are used to be opened and closed remotely Take one control auxiliary and one signalling auxiliary The signalling auxiliary must be placed between the remote control and the control auxiliary	
		Standard	
1	4 062 91	Control voltage 230 V \sim	No. of modules 1
		With integrated automatic resetting	
		Automatically resets the product with which it is used, thus ensuring continuity of service	
1	4 062 93	24 - 48 V \sim /=	2
1	4 062 95	230 V \sim	2
